

Tharat Institute of Aeronautics PATNA AIRPORT, PATNA - 800 014

SYLLABUS FOR CAT-B2

TYPE OF TRAINING	LOCATION	ALLOTTED TIME (MINIMUM)
TYPE OF TRAINING	LOCATION	Cat. B2
Knowledge Training	In-House	1440
Dractical Training	In-House	640
Practical Training	Sub-contracted	320
Total Allotted Hours		2400

		/LEDGE TRAINING HOURS (CATEGORY B2)	
Semester	Module No.	Module Name	Hours
	M. 03	Electrical Fundamentals	90
	M. 08	Basic Aerodynamics	70
1	M. 9A	Human Factors	60
1	M. 10	Aviation Legislation (Part – I)	110
	M. 13	Aircraft Aerodynamics, Structures and Systems (Part – I)	91
	M. 04	Electronic Fundamental (Part – I)	75
	M. 7A	Maintenance Practices (Part – I)	90
2	M. 10	Aviation Legislation (Part – II)	110
	M. 13	Aircraft Aerodynamics, Structures and Systems(Part – II)	95
	M. 04	Electronic Fundamental (Part – II)	72
3	M. 05	Digital Techniques/Electronic Instrument Systems (Part – I)	70
	M. 06	Materials and Hardware (Part – I)	80
	M. 7A	Maintenance Practices (Part – II)	90
	M. 13	Aircraft Aerodynamics, Structures and Systems (Part – III)	84
	M. 05	Digital Techniques/Electronic Instrument Systems (Part – II)	70
	M. 06	Materials and Hardware (Part – II)	60
4	M. 13	Aircraft Aerodynamics, Structures and Systems (Part – IV)	63
	M. 14	Propulsion	60
		TOTAL HOURS	1440
	PR	ACTICAL TRAINING HOURS (IN HOUSE)	
Semester		Title	Hours
4	Electrical Shop	Practical	74
1	Documentation		50
2	Hangar Practica	I (Part – I)	84
2	Fitting Shop		132
3	Hangar Practica	I (Part – II)	116
	Hangar Practica	, ,	100
4	Avionics Shop P		84
	·	RAINING HOURS (SUB-CONTRACTED)	320
		TOTAL TRAINING HOURS	2400

Bharat Institute of Aeronautics

PATNA AIRPORT, PATNA - 800 014

MODULE 3. ELECTRICAL FUNDAMENTALS

Bharat Institute of Aeronautics

PATNA AIRPORT, PATNA - 800 014

SYLLABUS PLAN

MODULE 3. ELECTRICAL FUNDAMENTALS

TOTAL ALLOTTED HOURS ALLOTTED: 90

S. No.	Main Topic	Sub-Topic	Hours	LEVEL
			Allotted	
3.1	Electron Theory	Structure and distribution of electrical	2	1
		charges within: atoms, molecules, ions,		
		compounds;		
		Molecular structure of conductors,		
		semiconductors and insulators.		
3.2	Static Electricity	Static electricity and distribution of	2	2
	and Conduction	electrostatic charges;		
		Electrostatic laws of attraction and		
		repulsion;		
		Units of charge, Coulomb's Law;		
		Conduction of electricity in solids,		
		liquids, gases and a vacuum		
3.3	Electrical	The following terms, their units and	2	2
	Terminology	factors affecting them: potential		
		difference, electromotive force,		
		voltage, current, resistance,		
		conductance, charge, conventional		
		current flow, electron flow.		
3.4	Generation of	Production of electricity by the	2	1
	Electricity	following methods: light, heat, friction,		
		pressure, chemical		
		action, magnetism and motion.		
3.5	DC Sources of	Construction and basic chemical action	8	2
	Electricity	of: primary cells, secondary cells, lead		
		acid cells, nickel cadmium cells, other		
		alkaline cells;		
		Cells connected in series and parallel;		
		Internal resistance and its effect on a		
		battery;		
		Construction, materials and operation		

Tharat Institute of Aeronautics PATNA AIRPORT, PATNA - 800 014

		of thermocouples;		
		Operation of photo-cells.		
3.6	DC Circuits	Ohms Law, Kirchhoff's Voltage and Current Laws; Calculations using the above laws to find resistance, voltage and current; Significance of the internal resistance of a supply.	4	2
3.7	Resistance/Resist or	(m) Resistance and affecting factors; Specific resistance; Resistor color code, values and tolerances, preferred values, wattage ratings; Resistors in series and parallel; Calculation of total resistance using series, parallel and series parallel combinations; Operation and use of potentiometers and rheostats; Operation of Wheatstone Bridge;	6	2
		(b) Positive and negative temperature coefficient conductance; Fixed resistors, stability, tolerance and limitations, methods of construction; Variable resistors, thermostats, voltage dependent resistors; Construction of potentiometers and rheostats; Construction of Wheatstone Bridge.		1
3.8	Power	Power, work and energy (kinetic and potential); Dissipation of power by a resistor; Power formula; Calculations involving power, work and energy	2	2
3.9	Capacitance/Capa citor	Operation and function of a capacitor; Factors affecting capacitance area of	5	2

		plates, distance between plates, number of plates, dielectric and dielectric constant, working voltage, voltage rating; Capacitor types, construction and function; Capacitor color coding; Calculations of capacitance and voltage in series and parallel circuits; Exponential charge and discharge of a capacitor, time constants; Testing of capacitors.		
3.10	Magnetism	(n) Theory of magnetism; Properties of a magnet; Action of a magnet suspended in the Earth's magnetic field; Magnetization and demagnetization; Magnetic shielding; Various types of magnetic material; Electromagnets construction and principles of operation; Hand clasp rules to determine: magnetic field around current carrying conductor;	4	2
		(b) Magneto motive force, field strength, magnetic flux density, permeability, hysteresis loop, retentively, coercive force reluctance, saturation point, eddy currents; Precautions for care and storage of magnets.	4	2

3.11	Inductance/Inductor	Faraday's Law; Action of inducing a voltage in a conductor moving in a magnetic field; Induction principles; Effects of the following on the magnitude of an induced voltage: magnetic field strength, rate of change of flux, number of conductor turns; Mutual induction; The effect the rate of change of primary current and mutual inductance has on induced voltage; Factors affecting mutual inductance: number of turns in coil, physical size of coil, permeability of coil, position of coils with respect to each other; Lenz's Law and polarity determining rules; Back emf, self induction; Saturation point; Principle uses of inductors.	8	2
3.12	DC Motor/Generator Theory	Basic motor and generator theory; Construction and purpose of components in DC generator; Operation of, and factors affecting output and direction of current flow in DC generators; Operation of, and factors affecting output power, torque, speed and direction of rotation of DC motors; Series wound, shunt wound and compound motors; Starter Generator construction.	10	2

			1	
3.13	AC Theory	Sinusoidal waveform: phase, period, frequency, cycle; Instantaneous, average, root mean square, peak, peak to peak current values and calculations of these values, in relation to voltage, current and power; Triangular/Square waves; Single/3 phase principles.	3	2
3.14	Resistive I, Capacitive I and Inductive (L) Circuits	Phase relationship of voltage and current in L, C and R circuits, parallel, series and series parallel; Power dissipation in L, C and R circuits; Impedance, phase angle, power factor and current calculations; True power, apparent power and reactive power calculations.	6	2
3.15	Transformers	Transformer construction principles and operation; Transformer losses and methods for overcoming them; Transformer action under load and no-load conditions; Power transfer, efficiency, polarity markings; Calculation of line and phase voltages and currents; Calculation of power in a three phase system; Primary and Secondary current, voltage, turns ratio, power, efficiency; Auto transformers.	8	2
3.16	Filters	Operation, application and uses of the following filters: low pass, high pass, band pass, band stop.	2	1
3.17	AC Generators	Rotation of loop in a magnetic field and waveform produced; Operation and construction of	6	2

		Total Allotted Hours	90	
		inductor, shaded or split pole.		
		producing a rotating field: capacitor,		
		direction of rotation; Methods of		
		Methods of speed control and		
		motors both single and polyphase;		
		and induction		
		and characteristics of: AC synchronous		
3.18	AC Motors	Construction, principles of operation	6	2
		Permanent Magnet Generators.		
		uses;		
		and delta connections advantages and		
		phase alternators; Three phase star		
		Single phase, two phase and three		
		type AC generators;		
		revolving armature and revolving field		

Bharat Institute of Aeronautics

PATNA AIRPORT, PATNA - 800 014

MODULE 4
:ELECTRONIC
FUNDAMENTALS

Bharat Institute of Aeronautics

PATNA AIRPORT, PATNA - 800 014

SYLLABUS PLAN

MODULE 4. ELECTRONIC FUNDAMENTALS (PART – I)

S. No.	Main topic	Sub topic	Hours Allotted	Level
4.1.1	Diodes	(o) Diode symbols;	10	2
		Diode characteristics and properties;		
		Diodes in series and parallel;		
		Main characteristics and use of silicon-		
		controlled rectifiers (thyristors),		
		lightemitting diode, photo conductive		
		diode, varistor, rectifier diodes;		
		Functional testing of diodes.		
		(b) Materials, electron configuration,	30	2
		electrical properties; P and N type		
		materials: effects of impurities on		
		conduction, majority and		
		minority characters; PN junction in a		
		semiconductor, development of a potential		
		across a PN junction in unbiased, forward		
		biased and reverse biased conditions;		
		Operation and function of diodes in the		
		following circuits: clippers, clampers,		
		full and half wave rectifiers, bridge		
		rectifiers, voltage doublers and triplers;		
		Detailed operation and characteristics of		
		the following devices: silicon-controlled		
		rectifier (thyristor), light emitting diode,		
		Shottky diode, photo conductive diode,		
		varactor diode, varistor, rectifier diodes,		
		Zener diode.		
4.1.2	Transistors	(p) Transistor symbols;	05	2
		Component description and orientation;		
		Transistor characteristics and properties.		
		(b)Construction and operation of PNP and	30	2
		NPN transistors;		

Tharat Institute of Aeronautics PATNA AIRPORT, PATNA - 800 014

Base, collector and emitter configurations; Testing of transistors. Basic appreciation of other transistor types and their uses. Application of transistors: classes of amplifier (A, B, C); Simple circuits including: bias, decoupling, feedback and 124 tabilization; Multistage circuit principles: cascades, push-pull, oscillators, multivibrators, flip-flop circuits.		
Total Allotted Hours	75	

Bharat Institute of Aeronautics

PATNA AIRPORT, PATNA - 800 014

SYLLABUS PLAN

MODULE 4. ELECTRONIC FUNDAMENTALS (PART – II)

S. No.	Main topic	Sub topic	Hours Allotted	Level
4.1.3	Integrated Circuits	(b) Description and operation of logic circuits and linear circuits; Introduction to operation and function of an operational amplifier used as: integrator, differentiator, voltage follower, comparator; Operation and amplifier stages connecting methods: resistive capacitive, inductive (transformer), inductive resistive (IR), direct; Advantages and disadvantages of positive and negative feedback.	37	2
4.2	Printed Circuit Boards	Description and use of printed circuit boards.	10	2
4.3	Servomechanisms	(b) Understanding of the following terms: Open and closed loop, follow up, servomechanism, analogue, transducer, null, damping, feedback, deadband; Construction operation and use of the following synchro system components: resolvers, differential, control and torque, E and I transformers, inductance transmitters, capacitance transmitters, synchronous transmitters; Servomechanism defects, reversal of synchro leads, hunting.	25	2
		Total Hours	72	

Bharat Institute of Aeronautics

PATNA AIRPORT, PATNA - 800 014

MODULE 5. DIGITALTECHNIQUES/ELE CTRONIC INSTRUMENT SYSTEM

Bharat Institute of Aeronautics

PATNA AIRPORT, PATNA - 800 014

SYLLABUS PLAN

MODULE 5. DIGITAL TECHNIQUES ELECTRONIC INSTRUMENTSYSTEMS (PART – I) TOTAL ALLOTTED HOURS: 70

S. No.	Main topic	Sub topic	Hours Allotted	Level
5.1	Electronic	Typical systems arrangements and cockpit layout	12	3
	Instrument	of electronic instrument systems.		
	Systems			
5.2	Numbering	Numbering systems: binary, octal and	10	2
	Systems	hexadecimal;		
		Demonstration of conversions between the		
		decimal and binary, octal		
		and hexadecimal systems and vice versa.		
5.3	Data Conversion	Analogue Data, Digital Data;	10	2
		Operation and application of analogue to digital,		
		and digital to analogue converters, inputs and		
		outputs, limitations of various types.		
5.4	Data Buses	Operation of data buses in aircraft systems,	8	2
		including knowledge of ARINC and other		
		specifications.		
5.5	Logic Circuits	(q) Identification of common logic gate symbols,	10	2
		tables and equivalent circuits;		
		Applications used for aircraft systems, schematic		
		diagrams		
		(b)Interpretation of logic diagrams.	10	2
5.6	Basic Computer	(b) Computer related terminology; Operation,	10	2
	Structure	layout and interface of the major components in a		
		micro		
		computer including their associated bus systems;		
		Information contained in single and multi-address		
		instruction words; Memory associated terms;		
		Operation of typical memory devices;		
		Operation, advantages and disadvantages of the		
		various data storage systems.		
		Total Allotted Hours	70	

Bharat Institute of Aeronautics

PATNA AIRPORT, PATNA - 800 014

SYLLABUS PLAN

MODULE 5. DIGITAL TECHNIQUES ELECTRONIC INSTRUMENTSYSTEMS (PART – II) TOTAL ALLOTTED HOURS: 70

S. No.	Main topic	Sub topic	Hours Allotted	Level
5.7	Microprocessors	Functions performed and overall operation of a	10	2
		microprocessor;		
		Basic operation of each of the following		
		microprocessor elements: control and		
		processing unit, clock, register, arithmetic logic		
		unit.		
5.8	Integrated Circuits	Operation and use of encoders and decoders	10	2
		Function of encoder types		
		Uses of medium, large and very large-scale		
5.9	Naultiniania	integration	10	2
5.9	Multiplexing	Operation, application and identification in	10	2
		logic diagrams of multiplexers and demultiplexers.		
5.10	Fibre Optics	Advantages and disadvantages of fibre optic	10	2
3.10	Fibre Optics	data transmission over electrical wire	10	
		propagation;		
		Fibre optic data bus;		
		Fibre optic related terms;		
		Terminations; Couplers, control terminals,		
		remote terminals;		
		Application of fibre optics in aircraft systems.		
5.11	Electronic	Principles of operation of common types of	6	2
	Displays	displays used in modern		
		aircraft, including		
		Cathode Ray Tubes, Light Emitting Diodes and		
		Liquid		
		Crystal Display.		
5.12	Electrostatic	Special handling of components sensitive to	4	2
	Sensitive Devices	electrostatic discharges;		
		Awareness of risks and possible damage,		
		component and personnel anti-static		

Tharat Institute of Aeronautics PATNA AIRPORT, PATNA - 800 014

		protection devices.		
5.13	Software	Awareness of restrictions, airworthiness	5	2
	Management	requirements and possible catastrophic effects		
	Control	of unapproved changes to software		
		programmes.		
5.14	Electromagnetic	Influence of the following phenomena on	5	2
	Environment	maintenance practices for electronic system:		
		EMC-Electromagnetic Compatibility		
		EMI-Electromagnetic Interference		
		HIRF-High Intensity Radiated Field		
		Lightning/lightning protection		
5.15	Typical	General arrangement of typical	5	2
	Electronic/Digital	electronic/digital aircraft systems and		
	Aircraft Systems	associated BITE (Built-In Test Equipment)		
		testing such as:		
		(r) ACARS-ARINC Communication and		
		Addressing and Reporting System		
		EICAS-Engine Indication and Crew Alerting		
		System		
		FBW-Fly by Wire		
		FMS-Flight Management System		
		IRS-Inertial reference system		
		(h) FCANA Floatronic Controliced Aircreft		2
		(b) ECAM-Electronic Centralised Aircraft Monitoring	5	2
		EFIS-Electronic Flight Instrument System		
		GPS-Global Positioning System		
		TCAS-Traffic Collision Avoidance system		
		Integrated modular Avionics,		
		Cabin System		
	1	Total Allotted Hours	70	

Bharat Institute of Aeronautics

PATNA AIRPORT, PATNA - 800 014

MODULE 6. MATERIALS AND HARDWARE

Bharat Institute of Aeronautics

PATNA AIRPORT, PATNA - 800 014

SYLLABUS PLAN

MODULE 6. MATERIALS AND HARDWARE (PART – I)

S. No.	Main topic	Sub topic	Hours Allotted	Level
6.5	Fasteners			
	6.5.1	Screw nomenclature; Thread forms, dimensions and	10	2
	Screw threads	tolerances for standard threads used in aircraft;		
		Measuring screw threads;		
	6.5.2	Bolt types: specification, identification and marking	10	2
	Bolts, studs and	of aircraft bolts, international standards;		
	screws	Nuts: self locking, anchor, standard types;		
		Machine screws: aircraft specifications;		
		Studs: types and uses, insertion and removal;		
		Self tapping screws, dowels.		
	6.5.3	Tab and spring washers, locking plates, split pins,	08	2
	Locking devices	palnuts, wire locking, quick		
		release fasteners, keys, circlips, cotter pins.		
	6.5.4	Types of solid and blind rivets: specifications and	15	1
	Aircraft rivets	identification, heat treatment.		
6.7	Springs	Types of springs, materials, characteristics and	05	1
		applications.		
6.8	Bearings	Purpose of bearings, loads, material, construction;	10	2
		Types of bearings and their application.		
6.9	Transmissions	Gear types and their application;	15	2
		Gear ratios, reduction and multiplication gear		
		systems, driven and driving		
		gears, idler gears, mesh patterns;		
		Belts and pulleys, chains and sprockets.		
6.10	Control Cables	Types of cables;	07	1
		End fittings, turnbuckles and compensation devices;		
		Pulleys and cable system components;		
		Bowden cables;		
		Aircraft flexible control systems.		
		Total Allotted Hours	80	

Bharat Institute of Aeronautics

PATNA AIRPORT, PATNA - 800 014

SYLLABUS PLAN MODULE 6. MATERIALS AND HARDWARE (PART – II)

S. No.	Main topic	Sub topic	Hours Allotted	Level
6.1	Aircraft Materials — Ferrous	(s) Characteristics, properties and identification of common alloy steels used in aircraft;Heat treatment and application of alloy steels;	06	1
		(b) Testing of ferrous materials for hardness, tensile strength, fatigue strength and impact resistance.		1
6.2	Aircraft Materials — Non-Ferrous	(t) Characteristics, properties and identification of common non-ferrous materials used in aircraft; Heat treatment and application of non-ferrous materials;	06	1
		(b) Testing of non-ferrous material for hardness, tensile strength, fatigue strength and impact resistance.		1
6.3.1	Composite and non-metallic other than wood and fabric	(u) Characteristics, properties and identification of common composite and non-metallic materials, other than wood, used in aircraft; Sealant and bonding agents.	10	2
6.4	Corrosion	 (a) Chemical fundamentals; Formation by, galvanic action process, microbiological, stress; (v) Types of corrosion and their identification; Causes of corrosion; Material types, susceptibility to corrosion. 	16	2
6.6	Pipes and Unions	(a) Identification of, and types of rigid and flexible pipes and their connectors used in aircraft;	10	2
		(b) Standard unions for aircraft hydraulic, fuel, oil, pneumatic and air system pipes.		1

Tharat Institute of Aeronautics PATNA AIRPORT, PATNA - 800 014

6.11	Electrical Cables	Cable types, construction and characteristics;	12	2
	and Connectors	High tension and co-axial cables; Crimping;		
		Connector types, pins, plugs, sockets,		
		insulators, current and voltage rating,		
		coupling, identification codes.		
	Total Hours		60	

Bharat Institute of Aeronautics

PATNA AIRPORT, PATNA - 800 014

MODULE 7A. MAINTENANCE PRACTICES

Bharat Institute of Aeronautics

PATNA AIRPORT, PATNA - 800 014

SYLLABUS PLAN

MODULE 7A: MAINTENANCE PRACTICES (PART – I)

S. No.	Main topic	Sub topic	Hours Allotted	Level
7.1	Safety	Aspects of safe working practices including	10	3
	Precautions-	precautions to take when working with electricity,		
	Aircraft and	gases especially oxygen, oils and chemicals.		
	Workshop	Also, instruction in the remedial action to be taken		
		in the event of a fire or another accident with one or		
		more of these hazards including knowledge on extinguishing agents.		
7.2	Workshop	Care of tools, control of tools, use of workshop	10	3
	Practices	materials; Dimensions, allowances and tolerances,		
		standards of workmanship; Calibration of tools and		
		equipment, calibration standards.		
7.3	Tools	Common hand tool types;	40	3
		Common power tool types;		
		Operation and use of precision measuring tools;		
		Lubrication equipment and methods.		
		Operation, function and use of electrical general test		
		equipment;		
7.4	Avionic General	Operation, function and use of avionic general test	20	3
	Test Equipment	equipment.		
7.20	Maintenance	Maintenance planning;	10	2
	Procedures	Modification procedures;		
		Stores procedures;		
		Certification/release procedures;		
		Interface with aircraft operation;		
		Maintenance Inspection/Quality Control/Quality		
		Assurance;		
		Additional maintenance procedures.		
		Control of life limited components		
		Total Hours	90	

Bharat Institute of Aeronautics

PATNA AIRPORT, PATNA - 800 014

SYLLABUS PLAN

MODULE 7A: MAINTENANCE PRACTICES (PART – II)

S. No.	Main topic	Sub topic	Hours Allotted	Level
7.5	Engineering	Drawing types and diagrams, their symbols,	20	2
	Drawings,	dimensions, tolerances and projections;		
	Diagrams and	Identifying title block information		
	Standards	Microfilm, microfiche and 136tabilizatio presentations;		
		Specification 100 of the Air Transport		
		Association (ATA) of America;		
		Aeronautical and other applicable standards		
		including ISO, AN, MS, NAS and MIL;		
		Wiring diagrams and schematic diagrams.		
7.6	Fits and	Drill sizes for bolt holes, classes of fits;	05	1
	Clearances	Common system of fits and clearances;		
		Schedule of fits and clearances for aircraft and		
		engines; Limits for bow, twist and wear;		
		Standard methods for checking shafts, bearings		
		and other parts.		
7.7	Electrical Wiring	Continuity, insulation and bonding techniques	20	3
	Interconnection	and testing;		
	System (EWIS)	Use of crimp tools: hand and hydraulic		
		operated;		
		Testing of crimp joints;		
		Connector pin removal and insertion;		
		Co-axial cables: testing and installation		
		precautions;		
		Identification of wire types, their inspection		
		criteria and damage tolerance.		
		Wiring protection techniques: Cable looming		
		and loom support, cable clamps, protective		
		sleeving techniques including heat shrink		
		wrapping, shielding.		
		EWIS installations, inspection, repair,		

		maintenance and cleanliness standards.		
7.15	Welding, Brazing,	(a) Soldering methods; inspection of soldered	08	2
	Soldering and	joints.		
	Bonding			
7.16	Aircraft Weight	(a) Centre of Gravity/Balance limits calculation:	07	2
	and Balance	use of relevant documents;		
7.17	Aircraft Handling	Aircraft taxiing/towing and associated safety	10	2
	and Storage	precautions;		
		Aircraft jacking, chocking, securing and		
		associated safety precautions;		
		Aircraft storage methods;		
		Refuelling/137tabiliza procedures;		
		De-icing/anti-icing procedures;		
		Electrical, hydraulic and pneumatic ground		
		supplies.		
		Effects of environmental conditions on aircraft		
		handling and operation.		
7.18	Disassembly,	(w)Types of defects and visual inspection	12	3
	Inspection, Repair	techniques.		
	and Assembly	Corrosion removal, assessment and		
	Techniques	reprotection.		
		I Non-destructive inspection techniques		1
		including, penetrant, radiographic, eddy		
		current, ultrasonic and boroscope methods.		
		(d) Disassembly and re-assembly techniques.		2
		(e) Trouble shooting techniques		2
7.19	Abnormal Events	(a) Inspections following lightning strikes and	08	2
		HIRF penetration.		
		Total Hours	90	

Bharat Institute of Aeronautics

PATNA AIRPORT, PATNA - 800 014

MODULE 8. BASIC AERODYNAMICS

Bharat Institute of Aeronautics

PATNA AIRPORT, PATNA - 800 014

SYLLABUS PLAN

MODULE 8. BASIC AERODYNAMICS

S. No.	Main Topic	Sub-Topic	Hours Allotted	LEVEL
8.1	Physics of the Atmosphere	International Standard Atmosphere (ISA), application to aerodynamics	5	2
8.2	Aerodynamics	Airflow around a body; Boundary layer, laminar and turbulent flow, free stream flow, relative airflow, up wash and downwash, vortices, stagnation; The terms: camber, chord, mean aerodynamic chord, profile (parasite) drag, induced drag, Centre of pressure, angle of attack, wash in and wash out, fineness ratio, wing shape and aspect ratio; Thrust, Weight, Aerodynamic Resultant; Generation of Lift and Drag: Angle of Attack, Lift coefficient, Drag coefficient, polar curve, stall; Aerofoil contamination including ice, snow, frost.	30	2
8.3	Theory of Flight Flight Stability	Relationship between lift, weight, thrust and drag; Glide ratio; Steady state flights, performance; Theory of the turn; Influence of load factor: stall, flight envelope and structural limitations; Lift augmentation. Longitudinal, lateral and directional stability (active and passive)	25 10	2
	and Dynamics	stability (active and passive). Total Allotted Hours	70	

Bharat Institute of Aeronautics

PATNA AIRPORT, PATNA - 800 014

MODULE 9A. HUMAN FACTOR

Bharat Institute of Aeronautics

PATNA AIRPORT, PATNA - 800 014

SYLLABUS PLAN

MODULE 9A. HUMAN FACTOR

S. No.	Main Topic	Sub-Topic	Hours Allotted	LEVEL
9.1	General	The need to take human factors into account; Incidents attributable to human factors/human error; 'Murphy's' law.	5	2
9.2	Human Performance and Limitations	Vision; Hearing; Information processing; Attention and perception; Memory; Claustrophobia and physical access.	15	2
9.3	Social Psychology	Responsibility: individual and group; Motivation and de-motivation; Peer pressure; 'Culture' issues; Team working; Management, supervision and leadership.	5	1
9.4	Factors Affecting Performance	Fitness/health; Stress: domestic and work related; Time pressure and deadlines; Workload: overload and under load; Sleep and fatigue, shift work; Alcohol, medication, drug abuse.	5	2
9.5	Physical Environment	Noise and fumes; Illumination; Climate and temperature; Motion and vibration; Working environment.	5	1

		Physical work;		
9.6	Tasks	Repetitive tasks;	5	1
9.6	IdSKS	Visual inspection;	5	1
		Complex systems.		
		Within and between teams;		
9.7	Communicati	Work logging and recording;	5	2
9.7	on	Keeping up to date, currency;	5	2
		Dissemination of information.		
		Error models and theories;		
9.8	Human Error	Types of error in maintenance tasks;	10	2
9.6	Hullian Elloi	Implications of errors (i.e. accidents);		
		Avoiding and managing errors.		
	Hazards in	Recognizing and avoiding hazards;		
9.9	the	Dealing with emergencies.	5	2
	Workplace			
	Total Allotted Hours			

Bharat Institute of Aeronautics

PATNA AIRPORT, PATNA - 800 014

MODULE 10. AVIATION LEGISLATION

Bharat Institute of Aeronautics

PATNA AIRPORT, PATNA - 800 014

SYLLABUS PLAN

MODULE 10. AVIATION LEGISLATION (Part – I)

S. No.	Main Topic	Sub-Topic	Hours Allotted	LEVEL
10.1	Regulatory Framework	Role of the International Civil Aviation Organisation; The Aircraft Act and Rules made there under Role of the DGCA; Relationship between CAR-21, CAR-M, CAR-145, CAR-66, CAR-147 The Aircraft Rules (Applicable to Aircraft Maintenance and release) Aeronautical Information and Circulars (Applicable to Aircraft Maintenance and release) CAR Sections 1 and 2	25	1
10.3	CAR-145 Approved Maintenance Organisations	Detailed understanding of CAR-145 and CAR-M Subpart F.	40	2
10.6	CAR-M	Detailed understanding of CAR-M provisions related to continuing airworthiness. Detailed understanding of CAR-M.	40	2
10.8	Safety Management System	State safety program, Basic safety Concepts Hazards and safety Risks, SMS Operations SMS Safety Performance Safety Assurance	5	2
		Total Allotted Hours	110	

Bharat Institute of Aeronautics

PATNA AIRPORT, PATNA - 800 014

SYLLABUS PLAN

MODULE 10. AVIATION LEGISLATION (Part – II)

S. No.	Main Topic	Sub-Topic	Hours Allotted	LEVEL
10.2	CAR-66 Certifying Staff- Maintenance	Detailed understanding of CAR-66.	30	2
10.4	Aircraft operations	Commercial Air Transport/Commercial Operations Air Operators Certificates; Operator's responsibilities, in particular regarding continuing airworthiness and maintenance; Documents to be carried on board; Aircraft placarding (markings).	25	1
10.5	Aircraft Certification	(x) General Certification Rules: such as FAA & EACS 23/25/27/29; Type Certification; Supplemental Type Certification; CAR-21 Design/Production Organisation Approvals. Aircraft Modifications and Repairs Approval and certification Permit to fly requirements	25	1
		(y) Documents Certificate of Airworthiness; Certificate of Registration; Noise Certificate; Weight Schedule; Radio Station License and Approval.		2
10.7	Applicable	(z) Maintenance Programs, Maintenance	20	2

	National and	checks and inspections, Master

AIRCRAFT

AERODYNAMICS,

STRUCTURES AND

SYSTEMS

Bharat Institute of Aeronautics

PATNA AIRPORT, PATNA - 800 014

SYLLABUS PLAN

Module 13 AIRCRAFT AERODYNAMICS, STRUCTURES AND SYSTEMS (Part – I) TOTAL ALLOTTED HOURS: 91

S. No.	Main topic	Sub topic	Hours Allotted	Level
13.1	Theory of Flight	 (bb) Aeroplane Aerodynamics and Flight Controls Operation and effect of: — roll control: ailerons and spoilers, — pitch control: elevators, stabilators, variable incidence 148tabilizati and canards, — yaw control, rudder limiters; Control using elevons, ruddervators; High lift devices: slots, slats, flaps; Drag inducing devices: spoilers, lift dumpers, speed brakes; Operation and effect of trim tabs, servo tabs, control surface bias; 	08	1
		(cc) High Speed Flight Speed of sound, subsonic flight, transonic flight, supersonic flight; Mach number, and critical Mach number;	03	1
		(dd) IRotary Wing Aerodynamics Terminology; Operation and effect of cyclic, collective and anti-torque controls.	05	1
13.2	Structures —	(a) Fundamentals of structural systems;	02	1
	General Concepts	(b) Zonal and station identification systems; Electrical bonding; Lightning strike protection provision.	03	2
13.3	Auto-flight (ATA 22)	Fundamentals of automatic flight control including working principles and current terminology; Command signal processing; Modes of operation: roll, pitch and yaw	38	3

		channels;		
		Yaw dampers;		
		Stability Augmentation System in helicopters;		
		Automatic trim control;		
		Autopilot navigation aids interface;		
		Auto-throttle systems;		
		Automatic Landing Systems: principles and		
		categories, modes of operation, approach,		
		glideslope, land, go-around, system monitors		
		and failure conditions.		
13.6	Equipment and	Electronic emergency equipment	07	3
	Furnishings	requirements;		
	(ATA 25)	Cabin entertainment equipment.		
13.7	Flight Controls	(ee) Primary controls: aileron, elevator,	10	2
	(ATA 27)	rudder, spoiler; Trim control;		
		Active load control;		
		High lift devices;		
		Lift dump, speed brakes;		
		System operation: manual, hydraulic,		
		pneumatic;		
		Artificial feel, Yaw damper, Mach trim, rudder		
		limiter, gust locks.		
		Stall protection systems;		
		(c) System operation: electrical, fly-by-wire.	05	3
13.12	Fire Protection	(ff) Fire and smoke detection and warning	80	3
	(ATA 26)	systems;		
		Fire extinguishing systems; and System tests;		
		(gg) Portable fire extinguisher	02	1
		Total Allotted Hours	91

SYLLABUS PLAN

MODULE 13 AIRCRAFT AERODYNAMICS, STRUCTURES AND SYSTEMS (PART – II) TOTAL ALLOTTED HOURS: 95

S. No.	Main topic	Sub topic	Hours Allotted	Level
13.4	Communication/	Fundamentals of radio wave propagation,	35	3
	Navigation (ATA	antennas, transmission lines, communication,		
	23/34)	receiver and		
		transmitter;		
		Working principles of following systems:		
		 Very High Frequency (VHF) communication, 		
		— High Frequency (HF) communication,		
		— Audio,		
		 Emergency Locator Transmitters, 		
		— Cockpit Voice Recorder,		
		 Very High Frequency omnidirectional range 		
		(VOR),		
		 Automatic Direction Finding (ADF), 		
		 Instrument Landing System (ILS), 		
		 Microwave Landing System (MLS), 		
		— Flight Director systems,		
		—Distance Measuring Equipment (DME),		
		 Very Low Frequency and hyperbolic 		
		navigation (VLF/Omega),		
		— Doppler navigation,		
		— Area navigation, RNAV systems,		
		 Flight Management Systems, 		
		— Global Positioning System (GPS),		
		—Global Navigation Satellite Systems (GNSS),		
		— Inertial Navigation System,		
		 Air Traffic Control transponder, secondary 		
		surveillance radar,		
		— Traffic Alert and Collision Avoidance System		
		(TCAS),		
		 Weather avoidance radar, 		

		— Radio altimeter,		
		— ARINC communication and reporting.		
13.8	Instruments	Classification;	35	3
	(ATA 31)	Atmosphere;		
	,	Terminology;		
		Pressure measuring devices and systems;		
		Pitot static systems;		
		Altimeters;		
		Vertical speed indicators;		
		Airspeed indicators;		
		Machmeters;		
		 Altitude reporting/alerting systems; 		
		Air data computers;		
		Instrument pneumatic systems;		
		Direct reading pressure and temperature		
		gauges;		
		Temperature indicating systems;		
		Fuel quantity indicating systems;		
		Gyroscopic principles;		
		Artificial horizons;		
		Slip indicators;		
		Directional gyros;		
		Ground Proximity Warning Systems;		
		Compass systems;		
		Flight Data Recording systems;		
		Electronic Flight Instrument Systems;		
		Instrument warning systems including master		
		warning systems and centralized warning		
		panels;		
		Stall warning systems and angle of attack		
		indicating systems;		
		Vibration measurement and indication;		
		Glass cockpit		
13.20	Integrated	Functions that may be typically integrated in	25	3
	Modular Avionics	the Integrated Modular Avionic (IMA) modules		
	(ATA42)	are, among others:		
		Bleed Management, Air Pressure Control, Air		

Cockpit Vo Control, A	n and Control, Avionics and entilation Control, Temperature ir Traffic Communication, Avionics cation Router, Electrical Load	
	ent, Circuit Breaker g, Electrical System BITE, Fuel	
Managem	ent, Braking Control, Steering	
Retraction	anding Gear Extension and n, Tyre Pressure Indication, Oleo	
Pressure I Monitorin	ndication, Brake Temperature g, etc.;	
	em; and Network Components.

SYLLABUS PLAN

Module 13 AIRCRAFT AERODYNAMICS, STRUCTURES AND SYSTEMS (Part – III) TOTAL ALLOTTED HOURS: 84

S. No.	Main topic	Sub topic	Hours Allotted	Level
13.11	Air Conditioning	1) Air supply, Sources of air supply including	05	2
	and Cabin	engine bleed, APU and ground cart;		
	Pressurisation	2) Air Conditioning	07	
	(ATA21)	Air conditioning systems;		2
		Air cycle and vapour cycle machines;		3
		Distribution systems;		1
		Flow, temperature and humidity control		3
		system.		
		3) Pressurisation: Pressurisation systems;	10	3
		Control and indication including control and		
		safety valves;		
		Cabin pressure controllers.		
		4) Safety and warning devices	02	3
		Protection and warning devices.		
13.13	Fuel Systems (ATA	System lay-out;	13	1
	28)	Fuel tanks;		1
		Supply systems;		1
		Dumping, venting and draining;		1
		Cross-feed and transfer;		2
		Indications and warnings;		3
		Refuelling and de-fuelling;		2
		Longitudinal balance fuel systems.		3
13.14	Hydraulic Power	System lay-out;	15	1
	(ATA 29)	Hydraulic fluids;		1
		Hydraulic reservoirs and accumulators;		1
		Pressure generation: electrical, mechanical,		3
		pneumatic;		
		 Emergency pressure generation; 		3
		• Filters;		1
		Pressure control;		3
		1	1	ر

		Power distribution;Indication and warning systems;		1 3
		 Interface with other systems. 		3
13.15	Ice and Rain Protection	Ice formation, classification and detection;	12	2 2
	(ATA 30)	Anti-icing systems: electrical, hot air and chemical;		3
		 De-icing systems: electrical, hot air, pneumatic, chemical; 		,
		Rain repellent;		1
		Probe and drain heating;		3
		Wiper Systems.		1
13.16	Landing Gear	Construction, shock absorbing;	08	1
	(ATA 32)	 Extension and retraction systems: normal and emergency; 		3
		Indications and warnings;		3
		 Wheels, brakes, antiskid and autobraking; 		3
		Tyres;		1
		Steering;		3
		Air-ground sensing		3
13.17	Oxygen (ATA 35)	System lay-out: cockpit, cabin; Sources,	05	3
		storage, charging and distribution; Supply regulation; Indications and warnings.		
13.18	Pneumatic/	System lay-out;	06	2
	Vacuum (ATA 36)	 Sources: engine/APU, compressors, reservoirs, ground supply; 		2
		Pressure control;		3
		Distribution;		1
		 Indications and warnings; 		3
		Interfaces with other systems.		3
13.19	Water/Waste	Water system lay-out, supply, distribution,	01	2
	(ATA 38)	servicing and draining; Toilet system lay-out, flushing and servicing.		
		Total Allotted Hours	84	

Bharat Institute of Aeronautics

PATNA AIRPORT, PATNA - 800 014

MODULE 13 (PART – IV)

AIRCRAFT

AERODYNAMICS,

STRUCTURES AND

SYSTEMS

Bharat Institute of Aeronautics

PATNA AIRPORT, PATNA - 800 014

SYLLABUS PLAN

MODULE 13 AIRCRAFT AERODYNAMICS, STRUCTURES AND SYSTEMS (PART – IV) TOTAL ALLOTTED HOURS: 63

S. No.	Main topic	Sub topic	Hours Allotted	Level
13.5	Electrical Power	Batteries Installation and Operation;	15	3
	(ATA 24)	DC power generation;		
		AC power generation;		
		Emergency power generation;		
		Voltage regulation;		
		Power distribution;		
		Inverters, transformers, rectifiers;		
		Circuit protection;		
		External/Ground power.		
13.9	Lights (ATA 33)	External: navigation, landing, taxiing, ice;	03	3
		Internal: cabin, cockpit, cargo;		
		Emergency.		
13.10	On Board	Central maintenance computers;	10	3
	Maintenance	Data loading system;		
	Systems (ATA 45)	Electronic library system;		
		Printing;		
		Structure monitoring (damage tolerance		
		monitoring).		
13.21	Cabin Systems	The units and components which furnish a means	17	3
	(ATA44)	of entertaining the passengers and providing		
		communication within the aircraft (Cabin		
		Intercommunication Data System) and between		
		the aircraft cabin and ground stations (Cabin		
		Network Service).		
		Includes voice, data, music and video		
		transmissions.		
		The Cabin Intercommunication Data System		
		provides an interface between cockpit/cabin crew		
		and cabin systems.		
		These systems support data exchange of the		
		different related LRU's and they are typically		

		operated via Flight Attendant Panels.		
		The Cabin Network Service typically consists on a		
		server, typically interfacing with, among others,		
		the following systems:		
		 Data/Radio Communication, In-Flight 		
		Entertainment System		
		The Cabin Network Service may host functions		
		such as:		
		 Access to pre-departure/departure reports, 		
		E-mail/intranet/Internet access,		
		— Passenger database;		
		—Cabin Core System;		
		—In-flight Entertainment System;		
		—External Communication System;		
		—Cabin Mass Memory System;		
		—Cabin Monitoring System;		
		—Miscellaneous Cabin System.		
13.22	Information	The units and components which furnish a means	18	3
	Systems (ATA46)	of storing, updating and retrieving digital		
		information traditionally provided on paper,		
		microfilm or		
		microfiche.		
		Includes units that are dedicated to the		
		information storage and retrieval function such as		
		the electronic library mass storage and controller.		
		Does not include units or components installed		
		for other uses and shared with other systems,		
		such as flight deck printer or general use display.		
		Typical examples include Air Traffic and		
		Information Management Systems and Network		
		Server Systems.		
		Aircraft General Information System;		
		Flight Deck Information System;		
		Maintenance Information System;		
		Passenger Cabin Information System;		
		Miscellaneous Information System.		
		Total Allotted Hours	63	

Bharat Institute of Aeronautics

PATNA AIRPORT, PATNA - 800 014

SYLLABUS PLAN MODULE 14. PROPULSION

TOTAL ALLOTTED HOURS: 60

S. No.	Main topic	Sub topic	Hours Allotted	Level
14.1	Turbine Engines	(hh) Constructional arrangement and operation of turbojet, turbofan, turbo shaft and turbo propeller engines;	10	1
		(b) Electronic Engine control and fuel metering systems (FADEC).	05	2
14.2	Engine Indicating Systems	Exhaust gas temperature/Interstage turbine temperature systems; Engine speed; Engine Thrust Indication: Engine Pressure Ratio, engine turbine discharge pressure or jet pipe pressure systems; Oil pressure and temperature; Fuel pressure, temperature and flow; Manifold pressure; Engine torque; Propeller speed.	30	2
14.3	Starting and Ignition Systems	Operation of engine start systems and components; Ignition systems and components; Maintenance safety requirements	15	2
		Total Allotted Hours	60	

Tharat Institute of Aeronautics PATNA AIRPORT, PATNA - 800 014

PRACTICAL TASK (IN-HOUSE)

MODULE. 7a. PRACTICALS TOTAL HRS: 132 HRS				
	FITTING SHOP			
SN	Task Title	Hours		
1	Fabricate external threads on a shaft using UNF thread die	2		
2	Check the diameter of different drill bits used in the fitting shop using vernier micrometer.	2		
3	Draw parallel lines and layout using Surface gauge, V-Block and Surface plate	2		
4	Check the true edges of a job using Fitter square and Surface plate	2		
5	Carryout pounding operation and stretching of stock using different types of hammers	2		
6	Carryout cutting operation on mild steel and Al alloy of metals using hacksaw	2		
7	Carryout drilling operation on a mild steel plate using a twist drill bit	2		
8	Fabricate internal threads on a pre drilled hole using Tap set	2		
9	measure the pitch, diameter of the thread, thread per inch (TPI) and accuracy of thread	2		
10	Matching of two metals blocks of mild steel as per drawing no – 7.1.1	20		
11	Fabrication of steel plate as per drawing no- 7.1.2	20		
12	Make a matching block of 'T' as per dwg. No- 7.1.3 given of mild steel plate	10		
13	Fabricate matching square block and drill a threaded hole as per dwg no-7.1.4 given on MS plate	10		
14	Fabricate a hexagonal block and fit it into a hexagonal slot as per given drawing no- 7.1.5	20		
15	Carryout rigid pipe flaring	4		
16	Make a elbow by bending a pipe	2		
17	Fabrication of base plate with clamp as per drawing – 7.1.6	20		
18	Removal of a broken screw/bolt from a threaded hole/tap hole	2		
19	Demonstrate the use of lubrication equipment according AMM	2		
20	Use a torque meter with and without extension.	4		
	TOTAL ALLOTTED HOURS	132		

MO	OTAL HRS: 74 HRS		
ELECTRICAL SHOP PRACTICALS			
SN	Task Title	Man Hours	
1	Check the continuity of a given wire	3	
2	Check the insulation resistance of given wire	3	
3	Perform crimping on a different electrical cables using crimping tand crimp joint (mechanically and electrically	3	
4	Bench charge battery	4	
5	Perform lacing and tying of electrical wire bundles	3	
6	Removal / Installation & Functional testing of landing light	5	
7	Perform bonding and insulation test	3	
8	Perform typical avionic testing using test equipment	4	
9	Use test meters to measure Volts, Amps and Resistance	4	
10	Check Aircraft Electrical Circuit for continuity in conjunction with Electrical wiring diagram	an 3	
11	Removal / Installation and functional testing of anti collision bea	con 5	
12.	Capacity test and charging of lead acid battery	16	
13.	Initial activation and charging of lead acid battery	16	
14.	Inspection of lead acid battery before charging	2	
	Total Allotted He	ours 74	

МО	MODULE 3, 7a. & 13 PRACTICAL TOTA			
	AVIONICS SHOP PRACTICALS			
SN	Task Title	Man Hours		
1.	Soldering of electrical component to PCB	8		
2.	Inspection of soldered joints	8		
3.	Calibration of hydraulic pressure gauge	8		
4.	Calibration of Pneumatic pressure gauge	8		
5.	Pitot static leak test	16		
6.	DC voltage measurement by using oscilloscope	4		
7.	Measurement of voltage between two points on a waveform	4		
8.	Measurement of time period of a waveform using oscilloscope	4		
9.	Measurement of frequency of waveform using frequency meter oscilloscope	or 4		
10.	Pulse width measurement of waveform	4		
11.	Dismantling, Inspection and assembly of Engine Oil Pressure Gauge	e 8		
12.	Dismantling, Inspection and assembly of DR Compass	8		
	Total Allotted Hou	urs 84		

MODULE. 13 TOTAL		. HRS: 84 HRS			
	HANGAR PRACTICALS (Part – I)				
SN.	Name of Task	Man Hours			
1.	Renew of silica gel crystals in flight compartment	4			
2.	Removal and installation of loud speaker	8			
3.	Safety precaution during working on avionics system	16			
4.	Inspection of avionics system	16			
5.	Inspection of static discharge wicks	8			
6.	Bonding test & insulation test	8			
7.	Inspection of external power port and connecting TRU	8			
8.	Inspection using mirror and light source	8			
9.	Checking earth path impedance standard practices	8			
	Total Allotted Hours	84			

MODULE. 13 TOTAL		HRS: 116 HRS			
	HANGAR PRACTICALS (Part – II)				
SN.	Name of Task	Man Hours			
1.	Removal and installation of weather radar antenna	16			
2.	Removal and installation of glideslope antenna	8			
3.	Removal and installation of VHF antenna	8			
4.	Routine inspection of magnetic compass	4			
5.	Removal and installation of magnetic compass	8			
6.	Inspection and test before installation of magnetic compass	8			
7.	Pivot friction test of standby compass	4			
8.	Damping test of magnetic compass	4			
9.	Compass swinging	8			
10.	Functional check of gyroscopic instruments	8			
11.	Visual inspection and maintenance of engine instruments	8			
12.	Inspection of pitot pressure head and electrical check	8			
13.	Inspection of pitot static instruments like altimeter, airspeed indicator, VSI and machmeter	8			
14.	Inspection of EGT thermocouple, harness and leads	8			
15.	Removal and installation of ADF antenna	8			
	Total Allotted Hours	116			

MODULE. 13 TOTAL		. HRS: 100 HRS			
	HANGAR PRACTICALS (Part – III)				
SN.	Name of Task	Man Hours			
1	Functional check of external lights	8			
2	Functional check of flight compartment lights	4			
3	Functional check of passenger's compartment lights	4			
4	Removal installation of beacon light	8			
5	Removal installation of Landing/taxi lights	8			
6	Removal installation of flight compartment/passenger's compartment light	8			
7	Removal and installation of starter generator	16			
8	Brush wear check of starter generator	8			
9	Removal and installation of AC generator	16			
10	Removal and installation of inverter	16			
11	Removal and installation of aircraft emergency battery	4			
	TOTAL ALLOTTED HOURS	100			

M	DDULE. 13 & 14 TOTAL ALLOTTED HOURS = !	50 HRS.	
DOCUMENTATION PRACTICAL			
SN.	Name of Task	Hours	
1	Prepare a Non-Routine task card for replacement of Brake assembly on aircraft. Also prepare removal tag for the brake assembly and note down the AMM and IPC ref. no. and refer IPC for part number and required Hardware	2	
2	An aircraft has come after Hard Landing in overweight condition as reported by pilot, take out the special inspection schedule referring AMM and prepare documents for occurrence reporting.	2	
3	You have carried out lay over inspection over an aircraft. Prepare documents required to relapse the aircraft for service.	2	
4	You have removed a component from the aircraft due to a confirmed fault in it, do the documentation to root the component to quarantine store.	2	
5	Take out the specimen copy of certificate of airworthiness and certificate of registration, confirm the validity of these documents and list the information available in these documents.	2	
6	An aircraft approved for ETOPS suffered a snag listed in min. equipment list.	2	
7	During damage mapping of the aircraft, it was observed that a dent on outer skin in non-pressurized area of tail section is beyond allowable limits. Refer structure repair manual and raise a non routine task sheet for the work.	2	
8	Take out a specimen copy of aircraft technical log book (Techlog) and report the required information. Calculate the no. of hrs remaining for the next A check.	2	
9	Take out a specimen copy of engine log book and record all the work done on engine including component replacement and snag rectification.	2	
10	Prepare documents to carry out duplicate inspection (Double check) on primary flight controls or engine controls.	2	
11	Engine driven hydraulic pump needs to be replaced as not developing required pressure, prepare documents for the jobs and label(tag) for the removed components.	2	
12	Pilot rejected take off due to fire warning on engine no. 1, refer trouble shooting manual(TSM) to raise the non routine task sheet and also prepare the documents for occurrence reporting.	2	
13	No. 1 engine generator was disconnected in flight due to overheat warning, do the necessary documentation to release the aircraft under MEL.	2	

	Total Allotted Hours	50
25	Report a tire-burst incident (during landing) and raise a non routine task sheet as per AMM.	2
24	From the engine logbook note down the serial number and part number from the engine driven hydraulic pump installed on the engine and cross check physically on the aircraft.	2
23	Engine Performance monitoring report shows a sudden drop in EGT margin. Raise an OFF JOB Sheet for the work to be carried out as per TSM and AMM giving reference number of the tasks.	2
22	A serviceable component is to be transferred from one aircraft to another aircraft. Document the process.	2
21	An engine ground runs to be carried out at idle power for leak check. Prepare a "Before-Start" checklist with safety precautions and raise an OFF JOB sheet with AMM Task reference number.	2
20	Empty weight of the aircraft increased by XXXX Kgs. After a structural repair. Prepare a revised weight and balance document for the Aircraft.	2
19	Prepare Cockpit and Emergency Checklist for takeoff, cruise and landing phases.	2
18	Demonstrate correct reading and interpretation of electrical wiring diagram	2
17	Prepare a document to show layout of On Board Emergency and Safety Equipment	2
16	Prepare Tech Log to reflect status of Pilot Defect Report, deferred maintenance and fuel and oil uplift before issuing CRS.	2
15	A last minute(pre-departure) snag of low bleed pressure resulted in a delay of 20 minutes to the scheduled flight, prepare the documents for defect and delay reporting.	2
14	During Airworthiness review certification (ARC), an item of inspection requires checking all the emergency equipment on board the aircraft. Prepare an offjob sheet (non routine task card) for the above referring AMM and LOPA)	2
